

# Shivneri About — Before & After

Source: Shivneri-Website-Content-Documentation.pdf (Section 7 — About)  
Scope: About page only · Text content swapped into the existing UI (no layout changes)  
Date: 2 July 2026

**Summary** — Every piece of the doc's About copy that fits the current layout has been applied as a text-only swap. The existing sections, components, and styling are untouched. The 3 brand-new sections the doc proposes (By-the-numbers stat strip, The Team, Client logos) were **not** added, and the doc's suggestion to move the Contact/Careers blocks to their own pages was **not** done — both would change the UI. See "Open items" at the end.

## 1 · Who We Are (doc Section 2 — Who we are)

Heading — kept

**UNCHANGED**  
Not Your Average **Dev & Cloud Shop** (already matches the doc)

Body paragraph

**BEFORE**  
We're the team companies call when they need modern software that actually ships. From cloud-native builds to pipelines and automation, we architect your future while fixing what's holding you back.

**AFTER VERBATIM**  
Shivneri is an AI-first product engineering studio. We help founders go from idea to shipped product without the handoffs, juniors, and overhead of a traditional agency. We build it, run it, and keep innovating.

## 2 · "Who we build for" accordion (doc Section 2 — re-ordered, startups first)

| BEFORE — 3 ITEMS                   | AFTER — 3 ITEMS (DOC ORDER) |
|------------------------------------|-----------------------------|
| Startups with big ideas            | Startups                    |
| Enterprises untangling old systems | Scale-ups                   |
| MSPs and IT teams                  | Enterprises                 |

New accordion copy (from doc Section 7 + the Brand & Positioning audience table)

**AFTER**  
**Startups** — From concept to production, fast. We're your full-stack launchpad — ship your MVP and AI features in weeks, not quarters, cloud-native from day one and built to scale.

**AFTER**

**Scale-ups** — Senior capacity without the hiring lag. Add a senior product and platform team this week — no three-month hire — that scales up or down as you grow.

**AFTER**  
**Enterprises** — Legacy modernization and zero-downtime migrations. We modernize old systems without breaking what already works, and keep you shipping.

3 · Mission · Vision · Purpose (doc Section 4 — MVP cards)

| Card    | BEFORE                                                                                                                                           | AFTER (doc)                                                                     |
|---------|--------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------|
| Mission | Build, scale, and run great software—fast, secure, and built for what's next.                                                                    | Build, scale, and run great software — fast, secure, and built for what's next. |
| Vision  | A world where every team can ship high-performing software without legacy drag or bloated overhead. — <b>already matched the doc, unchanged.</b> |                                                                                 |
| Purpose | We turn bold ideas into resilient, scalable systems—minus the red tape.                                                                          | We turn bold ideas into resilient, scalable systems — minus the red tape.       |

Content already matched the doc; the only change was normalizing the em dashes to the spaced style the style guide uses ("Em dash for asides — like this").

Open items — not changed (need your call)

**Hero subheadline — skipped (your choice).** The doc adds a subheadline under the hero H1 ("We're a lean, global crew of engineers, architects, and AI specialists who build software the right way — and stay to run it."). The current hero has no subheadline element, and you chose to keep it as headline + photo marquee only.

**Contact & Careers sections — kept in place.** The doc recommends moving the full contact block to **/contact** and the careers pitch to **/careers**. That's a structural change, so both remain on the About page as-is. The Careers copy needs no text change — it already uses the doc's on-brand phrase "Egos left at the door."

**Doc-only new sections NOT added** (would change the UI): By-the-numbers stat strip ("6+ years · 40+ products shipped · N senior engineers · N countries") · The Team section ("The people behind the work") · Client-logos wall ("Teams we've built for") · dedicated closing CTA block ("Want to work with a team that owns the outcome?").
