

Shivneri Services — Before & After

Source: Shivneri-Website-Content-Documentation.pdf (Section 5 — Services)
Scope: Services page only · Text content swapped into the existing UI (no layout changes)
Date: 2 July 2026

Summary — The 6 creative service cards were replaced with the doc's AI-first services, mirroring the homepage exactly — same 7 cards (5 core + UX/UI Design + Brand & Motion Design), same titles, descriptions, and videos. Each card also carries a short subtitle and a doc "What's included" feature list (services-page-only fields). The doc-only "How we engage" strip, "Support capabilities" block, and separate "Final CTA" were **not** added, to keep the UI unchanged — see "Open items".

1 • Hero (doc Section 5 — Services overview)

Badge

BEFORE
Development from UI to AI

AFTER
AI-first product engineering studio

Headline

BEFORE
Build Bold. Modernize Smart.

AFTER VERBATIM
From UI to AI — built by senior engineers.

Subheadline

BEFORE
From greenfield apps to SaaS modernization, we design, build, and scale software that's fast, secure, and built for what's next.

AFTER VERBATIM
We design, build, and scale AI products, automation, and full-stack software for funded startups. One senior team, end to end.

2 • Service cards (mirrors the homepage — 5 core + 2 support, 7-card grid)

BEFORE — 6 CARDS	AFTER — 7 CARDS (SAME AS HOMEPAGE)
UX/UI Design	AI Development
Web Development	AI Automation

BEFORE — 6 CARDS	AFTER — 7 CARDS (SAME AS HOMEPAGE)
Mobile Applications	Custom Software Development
Motion Graphics	Web Development
Branding	Mobile App Development
Video Production	UX/UI Design (support)
	Brand & Motion Design (support)

Card copy — identical to the homepage Services section (descriptions verbatim); features are the doc "What's included"

#	Card	Description (same as homepage) & features (doc)
01	AI Development	Custom LLM apps, RAG systems, AI agents, and intelligent features — engineered for production, not just demos. LLM application development · RAG & knowledge/retrieval systems · AI agents & copilots · Model integration & fine-tuning · Evals, guardrails & monitoring
02	AI Automation	We find the repetitive work draining your team and automate it — workflows, data, support, and ops. Workflow & process automation · Data pipelines & ETL · Document & email automation · Internal AI tools & copilots · Integrations (CRM, ERP, Slack)
03	Custom Software Development	Bespoke platforms, internal tools, and SaaS products on clean, scalable architecture you own. SaaS product development · Internal platforms & tools · APIs & integrations · Legacy modernization · System architecture & design
04	Web Development	Fast, modern web apps built with Next.js and a cloud-native stack — performant and SEO-ready. Web application development · Marketing & product sites · E-commerce · CMS integration · Performance & SEO optimization
05	Mobile App Development	High-performance iOS and Android apps that feel native and ship fast — from MVP to scale. Native iOS & Android · Cross-platform development · Mobile UX/UI design · API integration · App store launch & ASO
06	UX/UI Design (support)	Intuitive, polished product design that makes your software a pleasure to use. User research & personas · Wireframes & prototypes · Interactive & motion design · Design systems · Mobile-optimized design
07	Brand & Motion Design (support)	Branding, motion, and video — handled in-house, so your product looks as good as it works. Brand identity & guidelines · Logo & visual identity · Motion graphics & animation · Video production & editing · Marketing collateral

Card videos — identical to the homepage (no new assets): AI Development → development.mp4 · AI Automation → motion_graphics.mp4 · Custom Software → cube.mp4 · Web Development → Web_design.mp4 · Mobile App → mobile_application.mp4 · UX/UI Design → video_editing.mp4 · Brand & Motion Design → branding.mp4.

3 · Trust section (OurApproch.tsx — "Proven across industries")

Badge

BEFORE
Built for the Best. Trusted by Industry Leaders

AFTER DOC TRUST BAR

Trusted by founders building the next generation of products

Heading

BEFORE

Proven across industries, from startups to global enterprises

AFTER

Built for founders, from first MVP to global scale

Paragraph

BEFORE

Our clients rely on us to architect, build, and scale high-performance systems that power their growth. Whether modernizing legacy apps, launching new platforms, or powering developer productivity, we deliver with precision, speed, and reliability.

AFTER

Founders, CTOs, and product leaders come to us to ship AI products and full-stack software fast — then stay on to run and scale them. Senior engineers who own outcomes, from first commit to production. No handoffs, no bloat, no context lost.

Open items — not changed (need your call)

Logo carousel in the trust section still uses the placeholder logo2.png — swap in real client logos when available.

CTA section — already unified. The closing CTA ("We build it, ship it, and run it." → "Book a Free Call") was updated during the homepage pass and needs no further change.

Doc-only new blocks NOT added (would change the UI): "How we engage" strip (Fixed-scope project · Dedicated team · Fractional product team) · a standalone "Support capabilities" line · a separate "Final CTA" ("Not sure which service you need? Let's figure it out together.").

Per-card "View Project" button still has no destination — a link/wiring task, outside this text-only pass.
