

CONTENT UPDATE REPORT

Shivneri Homepage — Before & After

Source: Shivneri-Website-Content-Documentation.pdf (Section 4 — Homepage)

Scope: Homepage only · Text content swapped into the existing UI (no layout changes)

Date: 30 June 2026

Summary — Every piece of the doc's homepage copy that fits the current layout has been applied. All CTAs are unified to **"Book a Free Call"**. The 6 brand-new sections the doc proposes (Trust bar, Problem, Case-study, etc.) were not added, to keep the UI unchanged — see "Open items" at the end.

1 · Hero (doc Section 1)

Headline

BEFORE

Build Faster. Deploy Smarter. Scale Effortlessly.

AFTER VERBATIM

Ship AI-powered products at startup speed.

Subheadline

BEFORE

Advanced software engineering using next-generation architecture and technologies to power your applications, data, AI, and automation. Speed and scale—without limits.

AFTER VERBATIM

Shivneri is a lean, global engineering studio that builds AI software, automation, and full-stack apps — then stays on to run and scale them. No handoffs. No bloat. Just senior engineers who own outcomes.

2 · About / Approach (doc Section 1 — Brand & Positioning)

Heading

BEFORE
Shivneri Systems builds software for startups and enterprises alike — shipping cloud-native platforms and modernizing the legacy systems holding teams back. The focus stays the same: engineering that scales, automation that removes friction, and a team that owns delivery from first commit to production.
AFTER ADAPTED
Shivneri is an AI-first product engineering studio. We build AI software, automation, and full-stack products for funded startups and scale-ups — and we stay on to run and scale them. Not an agency or a body-shop. Just a small, senior team that owns outcomes end to end.

Paragraph 1

BEFORE
We're a lean, global crew of engineers, architects, and cloud experts. We design and build full-stack applications, modernize legacy systems, and stand up the platforms and pipelines that let teams ship with confidence.
AFTER
We work with founders, CTOs, and product leaders at funded startups and scale-ups — teams who need to ship fast and can't afford handoffs, juniors, or disappearing freelancers.

Paragraph 2

BEFORE
We build it, run it, and keep innovating — from secure cloud foundations to scalable applications and automation. No handoffs, no bloated teams, no context lost. Just deeply invested engineers who own delivery end to end.
AFTER
We build it, run it, and keep innovating — no handoffs, no bloat. Senior engineers who own delivery from first commit to production, and keep improving what we build.

Capabilities accordion

BEFORE	AFTER (AI-FIRST REFRESH)
Development · Platforms · Operate & Innovate · Security & Cloud	AI & Full-Stack Development · Cloud-Native Platforms · Run & Scale · Security & DevOps

3 · Why Shivneri (doc Section 5)

BEFORE — TITLE / BODY	AFTER — TITLE / BODY (DOC BULLETS)
Full-Stack + Full-Time Engineering No Contractors. No bloated teams. Just high quality deeply invested engineers who own full-stack end-to-end delivery.	Senior, Full-Time Engineers No juniors, no project handed to a contractor you'll never meet — just engineers who own full-stack delivery end to end.
Flexible, fractional product teams Need an expert, a specialist or a full-stack team? We plug in fast, ramp up instantly, and scale to deliver with precision and deep technical ownership.	Startup Velocity Small teams, tight loops, and working software in weeks, not quarters. Need an expert, a specialist, or a full-stack team? We plug in fast and scale with you.
We Build It. We Run It. We Innovate It. Shivneri delivers full-lifecycle engineering — from secure platform foundations to scalable applications and continuous innovation. No handoffs. No context lost.	We Build It. We Run It. We Keep Innovating. Ownership beyond launch — we deploy, monitor, secure, and keep improving what we build. India-based, working seamlessly with US, EU & GCC teams. No handoffs. No context lost.

Section link: "Explore how we work" → "**See how we work**" (→ /how-we-work). Section hook heading "Because Getting it Built isn't Enough." kept.

4 · Services (doc Section 4 — 5 core + 2 support, 7-card grid kept)

BEFORE — 7 CARDS	AFTER — 7 CARDS (DOC-FIRST)
AI & Automation UX/UI Design Mobile Applications Development Video Editing Graphic Design & Branding Motion Design	AI Development AI Automation Custom Software Development Web Development Mobile App Development UX/UI Design (support) Brand & Motion Design (support)

New descriptions (5 core = verbatim from the doc)

- **AI Development** — Custom LLM apps, RAG systems, AI agents, and intelligent features — engineered for production, not just demos.
- **AI Automation** — We find the repetitive work draining your team and automate it — workflows, data, support, and ops.
- **Custom Software Development** — Bespoke platforms, internal tools, and SaaS products on clean, scalable architecture you own.
- **Web Development** — Fast, modern web apps built with Next.js and a cloud-native stack — performant and SEO-ready.
- **Mobile App Development** — High-performance iOS and Android apps that feel native and ship fast — from MVP to scale.
- **UX/UI Design** — Intuitive, polished product design that makes your software a pleasure to use.
- **Brand & Motion Design** — Branding, motion, and video — handled in-house, so your product looks as good as it works. (doc support line)

5 · TL;DR / Final CTA (doc Section 8)

Heading

BEFORE
If you only read one thing, make it this.
AFTER
We build it, ship it, and run it.

Card paragraph

BEFORE
Your fractional product team, full-time engineering partner, and zero-BS cloud experts. We build it, ship it, and support it—with speed, clarity, and technical ownership.
AFTER
Your fractional product team and full-time engineering partner—with speed, clarity, and zero BS. No handoffs, no bloat—just senior engineers who own outcomes.

Button

BEFORE	AFTER
Book a 30-minute consultation	Book a Free Call

6 · Header (global nav)

BEFORE	AFTER
Book a meeting (desktop + mobile)	Book a Free Call (both)

All CTAs site-wide now read **"Book a Free Call"** per the doc's "one primary CTA" rule.

Open items — not changed (need your call)

- Hero eyebrow badge** — still "Modern Full-Stack Development & Engineering". The doc gives no badge text; it contradicts the AI-first headline. Suggested: "AI Development Studio".
- "Modernize" + showreel section** — "We help ambitious companies ship faster, scale smarter, and modernize without compromise." No homepage-doc equivalent; left unchanged. (Showreel is still an external/template video.)
- Doc-only new sections NOT added** (would change the UI): Trust bar · The Problem · Case-study spotlight · condensed How-we-work steps · separate Final CTA · Hero microcopy ("30 minutes. No pitch deck...").
